^ Due to the adoption of new accounting pronouncements, this amount has been adjusted from the amount originally reported. See reconciliation of adjustments on subsequent pages.

* As part of adjustments noted in ^, this amount has been recalculated.

* To supplement its financial statements, SPS Commerce also provides investors with Adjusted EBITDA and non-GAAP income per share, which are non-GAAP financial measures. SPS Commerce believes that these non-GAAP measures provide useful information to management and investors regarding certain financial and business trends relating to its financial condition and results of operations. SPS Commerce's management uses these non-GAAP measures to compare the company's performance to that of prior periods for trend analyses and planning purposes. It uses Adjusted EBITDA for purposes of determining executive and senior management incentive compensation. These measures are also presented to the company's board of directors.

Adjusted EBITDA consists of net income adjusted for depreciation and amortization, interest expense, interest income, income tax expense, stock-based compensation expense, the discrete impact from tax law change and other adjustments as necessary for a fair presentation. For additional information on the "other" adjustments for a specific period, please see Management's Discussion and Analysis of Financial Condition and Results of Operations in SPS Commerce's filings with the U.S. Securities and Exchange Commission. SPS Commerce uses Adjusted EBITDA as a measure of operating performance because it assists the company in comparing performance on a consistent basis, as it removes from operating results the impact of the company's capital structure. SPS Commerce believes Adjusted EBITDA is useful to an investor in evaluating the company's operating performance because it is widely used to measure a company's operating performance without regard to items such as depreciation and amortization, which can vary depending upon accounting methods and the book value of assets, and to present a meaningful measure of corporate performance exclusive of the company's capital structure and the method by which assets were acquired.

Non-GAAP income per share consists of Net income plus stock-based compensation expense, amortization expense related to intangible assets, the discrete impact from tax law change and other adjustments as necessary for a fair presentation divided by the weighted average number of shares of outstanding during each period. SPS Commerce includes an adjustment to non-GAAP income to reflect the income tax effects of the adjustments to GAAP net income, as discussed above. To quantify these tax effects, SPS Commerce recalculates income tax expense excluding the direct book and tax effects of the specific items constituting the non-GAAP adjustments (e.g., stock-based compensation expense). The difference between this recalculated income tax expense and GAAP income tax expense is presented as the income tax effect of the non-GAAP adjustments. SPS Commerce believes non-GAAP income per share is useful to an investor because it is widely used to measure a company's operating performance.

These non-GAAP measures should not be considered a substitute for, or superior to, financial measures calculated in accordance with generally accepted accounting principles in the United States. These non-GAAP financial measures exclude significant expenses and income that are required by GAAP to be recorded in the company's financial statements and are subject to inherent limitations. SPS Commerce urges investors to review the reconciliation of its non-GAAP financial measures to the comparable GAAP financial measures. The preceding tables provide reconciliations of net income to Adjusted EBITDA and non-GAAP income per share.

^ Pursuant to the adoption of Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* (Topic 606), and ASC 340-40, *Other Assets and Deferred Costs-Contracts With Customers*, in the first quarter of 2018, the Company adjusted its historical financial statements for 2016 and 2017 to reflect the new accounting guidance. The new standard impacts the accounting for certain upfront set-up fees and the periods over which the related revenues are recognized, the timing and periods over which expenses are recognized for sales commissions, the related tax impact due to changes in income (loss) before income taxes, and the related balance sheet accounts.

^ In the first quarter of 2018, and pursuant to the adoption of Accounting Standards Update No. 2014-09, *Revenue from Contracts with Customers* (Topic 606), and ASC 340-40, *Other Assets and Deferred Costs-Contracts With Customers*, the Company adjusted its historical financial statements for 2016 and 2017 to reflect the new accounting guidance. The new standard impacts the accounting for certain upfront set-up fees and the periods over which the related revenues are recognized, the timing and periods over which expenses are recognized for sales commissions, the related tax impact due to changes in income (loss) before income taxes, and the related balance sheet accounts.

* In the first quarter of 2017, and pursuant to Compliance and Disclosure Interpretations published by the U.S. Securities and Exchange Commission in May 2016 (the "May C&D") related to the use of non-GAAP financial measures, the Company began including an adjustment to non-GAAP income to reflect the income tax effects of the adjustments to GAAP net income. To quantify these tax effects, SPS Commerce recalculates income tax expense excluding the direct book and tax effects of the specific items constituting the non-GAAP adjustments (e.g., stock-based compensation expense). The difference between this recalculated income tax expense and GAAP income tax expense is presented as the income tax effect of the non-GAAP adjustments.
