Use of Non-GAAP Financial Measures

To supplement its financial statements, SPS Commerce also provides investors with Adjusted EBITDA, which is a non-GAAP financial measure. SPS Commerce believes that this non-GAAP measure provides useful information to management, our board of directors, and investors regarding certain financial and business trends relating to its financial condition and results of operations. SPS Commerce's management uses this non-GAAP measure to compare the company's performance to that of prior periods for trend analyses and planning purposes. Adjusted EBITDA is also used for purposes of determining executive and senior management incentive compensation.

Adjusted EBITDA consists of net income adjusted for income tax expense, depreciation and amortization expense, stock-based compensation expense, realized gain or loss from foreign currency on cash and investments held, investment income or loss, and other adjustments as necessary for a fair presentation.

SPS Commerce uses Adjusted EBITDA as a measure of operating performance because it assists the company in comparing performance on a consistent basis, as it removes from operating results the impact of the company's capital structure. SPS Commerce believes Adjusted EBITDA is useful to an investor in evaluating the company's operating performance because it is widely used to measure a company's operating performance without regard to items such as depreciation and amortization, which can vary depending upon accounting methods and the book value of assets, and

to present a meaningful measure of corporate performance exclusive of the company's capital structure and the method by which assets were acquired.

This non-GAAP measure should not be considered a substitute for, or superior to, financial measures calculated in accordance with generally accepted accounting principles in the United States. This non-GAAP financial measure excludes significant expenses and income that are required by GAAP to be recorded in the company's financial statements and are subject to inherent limitations.
