SPS Commerce Named an Inbound Logistics Top 100 Logistics IT Providers

Award highlights providers who enable logistics excellence

Minneapolis, Minn., May 15, 2013 - SPS Commerce, Inc. (Nasdaq: SPSC), a leader in enterprise retail cloud services, announced today that *Inbound Logistics* has selected SPS Commerce as one of the [Top 100 Logistics IT Providers for 2013](#). Every April, *Inbound Logistics*' editors recognize 100 logistics IT companies that support and enable logistics excellence. Award winners were selected from a pool of hundreds of companies, using questionnaires, personal interviews and other research.

"Implementing the best logistics technology helps large companies expand markets and small companies level the playing field with larger competitors," said Felecia Stratton, Editor, *Inbound Logistics*. "Best-in-class logistics IT also helps today's business logistics managers boost supply chain performance and customer service while cutting overall logistics costs. *Inbound Logistics* editors selected SPS Commerce for its consistent ability to deliver innovative solutions empowering logistics and supply chain excellence for companies large and small."

SPS Commerce offers logistics providers a suite of supply chain services allowing them to optimize operations through global customer integration, retail compliance and supply chain collaboration. In addition, SPS's Retail Universe allows 3PLs to showcase their businesses and capabilities to the 50,000 partners in the SPS network, and SPS's web-based EDI solutions connect 3PLs to the retailers, grocers, brokers and distributors to easily meet even the most complex requirements.

A complete listing of the 2013 Top 100 Logistics IT Providers is available at <http://www.inboundlogistics.com>.

About Inbound Logistics

Inbound Logistics is the pioneering publication of demand-driven logistics practices, also known as supply chain management. *IL's* educational mission is to guide businesses to efficiently manage logistics, reduce and speed inventory, and neutralize transportation cost increases by aligning supply to demand and adjusting enterprise functions to support that paradigm shift. More information about demand-driven logistics practices is available at www.inboundlogistics.com.
